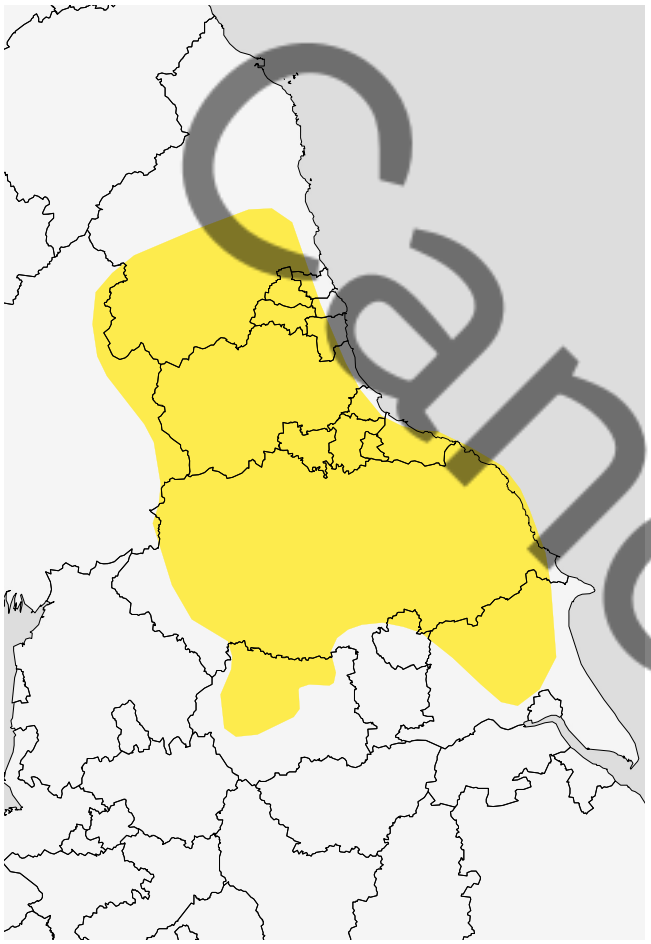
Yellow warning
Snow & Ice

Between
06:00 Sat 15 Feb 2025 and
14:00 Sat 15 Feb 2025



Cancelled

Snow and ice could lead to some disruption on Saturday

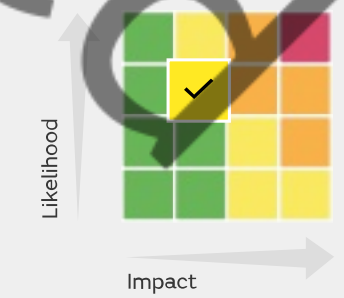
What to expect

- Some roads and railways likely to be affected with longer journey times by road, bus and train services
- Some injuries from slips and falls on icy surfaces
- Probably some icy patches on some untreated roads, pavements and cycle paths

Further details

Outbreaks of rain, sleet and snow are likely to develop early Saturday before easing from the west during the afternoon. Snow is more likely to the east of the Pennines, particularly above 150 metres, where 2-5 cm may accumulate over the North York Moors and Northumberland. To lower levels, any falling snow may struggle to accumulate though some places may see up to 2 cm before gradually easing during the afternoon. There is also a risk of ice over the Pennines, particularly above 200 metres where freezing rain is possible.

What Should I Do?



Medium likelihood of low impacts

Issued at 11:01 Fri 14 Feb, 2025 Cancelled at 05:27 Sat 15 Feb, 2025

Yellow warning
Snow & Ice

Between
06:00 Sat 15 Feb 2025 and
14:00 Sat 15 Feb 2025

Further Details (continued)

Snowy, wintry weather can cause delays and make driving conditions dangerous. Keep yourself and others safe by planning your route, giving yourself extra time for your journey. Check for road closures or delays to public transport and amend plans if necessary.

If driving, make sure you have some essentials in your car in the event of any delays (e.g., warm clothing, food, water, a blanket, a torch, ice scraper/de icer, a warning triangle, high visibility vest and an in-car phone charger).

If you need to make a journey on foot, try to use pavements along main roads which are likely to be less slippery. Similarly, if cycling, try and stick to main roads which are more likely to have been treated.

Give yourself the best chance of avoiding delays by checking road conditions if driving, or bus and train timetables, amending your travel plans if necessary.

Be prepared for weather warnings to change quickly: when a weather warning is issued, the Met Office recommends staying up to date with the weather forecast in your area.

Reason for cancellation

Although parts of the warning area may see some ice and snow, this is less likely to be impactful, and with a likely focus further south.
